

## PRESS RELEASE

### FOR IMMEDIATE RELEASE

#### **sovaSage, Inc. Successfully Completes Independent HIPAA Audit, Reinforcing Longstanding Commitment to Data Security and Patient Privacy**

**PITTSBURGH, PENNSYLVANIA, Jan. 09, 2026** -- sovaSage, Inc., a digital health SaaS company advancing sleep therapy and respiratory patient management, today announced the successful completion of an **independent, third-party HIPAA audit**, validating the Company's ongoing compliance with the Health Insurance Portability and Accountability Act (HIPAA) Privacy and Security Rules.

From its earliest platform architecture and operational design, sovaSage has treated data security, patient privacy, and regulatory compliance as foundational, not optional components of its technology and service delivery model. The completion of this independent HIPAA audit and resulting certification serve as formal, third-party validation of controls, policies, and safeguards that have been embedded into the organization's practices from the outset.

"HIPAA compliance has never been a checkbox exercise for us, it is a core principle that guides how we design our platform, engage with customers, and earn trust across the sovaSage ecosystem," said **Christian Kebekus, Co-Founder and Chief Information Officer of sovaSage, Inc.**

"Trust is the currency of healthcare, this independent audit and certification confirm the rigor, discipline, and accountability we have consistently applied to protecting patient data as we scale." said **William Kaigler, Chief Executive Officer of sovaSage, Inc.**

The independent assessment evaluated sovaSage's administrative, technical, and physical safeguards, including data access controls, risk management processes, audit logging, incident response planning, and workforce training. Successful completion demonstrates that sovaSage maintains appropriate and effective controls to ensure the confidentiality, integrity, and availability of protected health information (PHI). As sovaSage continues to expand its product portfolio and partner ecosystem, the Company remains committed to proactive compliance, continuous monitoring, and ongoing third-party validation.

#### **About sovaSage, Inc.**

sovaSage, Inc. is a digital health SaaS company supporting durable medical equipment (DME) providers, sleep labs, and healthcare organizations focused on improving the treatment and management of obstructive sleep apnea (OSA). The company's operational platform leverages advanced automation, AI-driven engagement, and data-driven insights to improve outcomes for PAP patients while increasing ROI and reducing operational burden for providers and their care teams.
