

**PRESS RELEASE
FOR IMMEDIATE RELEASE**

sovaSage Announces Strategic API Integration with NikoHealth to Streamline End-to-End HME Workflows

PITTSBURGH, PENNSYLVANIA, Jan. 20, 2026 -- sovaSage, Inc., a digital health SaaS company advancing sleep and respiratory therapy management, today announced the successful completion of a robust API integration with NikoHealth, a leading automation platform for home medical equipment (HME) providers specializing in billing, claims processing, and operational efficiency.

The integration enables secure, bi-directional data flow between NikoHealth's intake, order management, delivery, billing, and claims workflows and the sovaSage platform including **sovaFitTM**, **sovaGuideTM** featuring **JeanieTM**, and **sovaStartTM**, creating a more seamless, automated, and scalable experience for HME providers and their care teams.

Eliminating Silos Across the Patient and Revenue Lifecycle

Through this API integration, critical patient, device, and operational data can move efficiently from intake and delivery through billing and ongoing therapy management. This reduces manual data entry, minimizes errors, and ensures consistent, accurate information across clinical, operational, and financial systems.

Supporting Better Patient Outcomes and Business Performance

By connecting NikoHealth's automation engine with sovaSage's patient engagement and therapy management solutions, providers gain a more complete view of the patient journey, from prescription and setup to compliance, and long-term therapy success.

The integration supports:

- Proactive patient engagement through sovaGuideTM featuring Jeanie
- Data-driven mask fitting and optimization via sovaFitTM
- Streamlined virtual setup and onboarding with sovaStartTM
- Improved visibility into therapy progress that supports payer compliance and audit readiness

"Interoperability is no longer optional for providers navigating increasing complexity, staffing concerns, and reimbursement pressure," said **William Kaigler, Co-founder and CEO** at sovaSage. "Our integration with NikoHealth helps eliminate operational friction while connecting the dots between patient care, compliance, and revenue, allowing providers to operate more efficiently while delivering a better patient experience."

Built for Scale, Security, and Compliance

The API integration was designed with security, scalability, and regulatory alignment in mind, supporting HIPAA-compliant data exchange and enabling providers to confidently expand digital workflows without adding operational risk.

Michael Kutsak, Founder and CEO at NikoHealth further commented that "As providers continue to modernize their technology stack, the combined capabilities of sovaSage and NikoHealth offer a future-ready foundation for growth, automation, and value-based care readiness."

About NikoHealth

NikoHealth is a leading cloud-based HME automation platform providing billing, claims processing, intake, inventory, and operational tools designed to help providers operate more efficiently and scale with confidence.

About sovaSage, Inc.

sovaSage, Inc. is a digital health SaaS company focused on improving the management of sleep and respiratory therapy through intelligent automation, patient engagement, and data-driven workflows. The sovaSage platform supports HME providers, sleep labs, and healthcare organizations by streamlining operations, enhancing patient adherence, and improving clinical and financial outcomes.
